

Exhibit A - Contract Addendum

- I. Sully Cooperative agrees to purchase and grower agrees to supply 100% of the soybeans grown on the contracted acreage, provided the minimum quality standards are met.
2. Grower agrees that no soybeans will be saved, sold to any other parties or used for seed purposes without written permission from Sully Cooperative Exchange.
3. Grower must keep fields reasonably free from weeds and/or exercise proper weed control measures. Sully Cooperative Exchange may make appropriate field inspections.
4. Quality must be acceptable for intended food grade applications.
5. The following conditions are unacceptable:
 - Weed seed of excessive quantity or of a size and density similar to soybeans, such as morning glory.
 - Presence of Black Nightshade or noxious weeds.
 - Contamination of the soybeans with corn or other crops.
 - Immature soybeans that are green or discolored, not entirely yellow in color.
 - Inadequate protein and germination levels, below normal food grade standards.
 - Excessive mechanical damage, splits, chips and/or severely broken cotyledons.
 - Heat damage, mold or downy mildew; or moisture level above 11.0%.
 - Excessive foreign material, dirty seed coats, purple seed stain and/or other below standard visual deterrents.
6. Representative samples will be submitted to Pacific Soybean & Grain immediately after harvest, for review
7. Pacific Soybean & Grain will establish proper screen sizes to be utilized by the cleaning plant, for quality control purposes.
8. Upon cleaning of harvested soybeans, there will be some shrinkage or loss of the screenings due to dirt, pods, stems, etc.
9. Grower warrants that this contracted crop is free of any security interest and/or other liens or encumbrances.
